- Find a participating retail pharmacy by ZIP code.
- Look up possible lower-cost medication alternatives.
- Compare medication pricing and options.

Note to existing members: This formulary has changed since last year. Please review this document to make sure it still contains the drugs you take.

When this drug list (formulary) refers to “we,” “us,” or “our,” it means Optum Rx. When it refers to “plan” or “our plan,” it means AlaskaCare.

Understanding your formulary

What is the Comprehensive Formulary?

A formulary is the plan's drug list selected by AlaskaCare in consultation with Optum Rx and a team of healthcare providers, which represents the prescription therapies believed to be a necessary part of a quality treatment program. This includes both the Part D and supplemental wrap (non-Part D) medications. This plan will generally cover the drugs listed in our formulary as long as the drug is medically necessary, and other plan rules are followed. Please note: the amount you pay for a drug will depend on if the prescription is filled at an Optum Rx network pharmacy, or not. If you fill a prescription out-of-network, you may have to pay the full price of the drug, then submit a claim for reimbursement.

Can the formulary (drug list) change?

Yes. If you are taking a drug on our 2023 formulary that is covered at the beginning of the year, we will continue coverage of the drug during the 2023 coverage year except when new adverse information about the safety or effectiveness of a drug is released.

If we make a change to our formulary (i.e. add prior authorization, quantity limit, and/or move a drug to a higher cost-sharing tier, if applicable), we must notify affected members. Members will receive a notice regarding the change at least 60 days before the change becomes effective, or at the time the member requests a refill of the drug. The member will receive a 60-day supply of the drug. If the Food and Drug Administration (FDA) deems a drug on our formulary to be unsafe, or the drug's manufacturer removes the drug from the market, we will immediately remove the drug from our formulary and provide notice to members who take the drug.

The enclosed formulary is current as of Dec. 1, 2022. To get updated information about covered drugs, please contact Optum Rx. Our contact information is shown on the front and back cover pages. You may also visit our website at [optumrx.com](https://www.optumrx.com) where you will find the most up-to-date information about our list of covered drugs (formulary) by using the "Drug Information" tool (found under the "Member Tools" tab).

About this formulary

Where differences exist between this list and your benefit plan, the benefit plan documents rule. This is not a complete list of your covered medications. Please review your benefit plan documents for full details. Not all formulary alternatives listed in this document may be appropriate for your specific condition. Please talk to your doctor.

How do I use the formulary?

There are 2 ways to find your drug within the formulary:

- **Medical condition**

The drugs in this formulary are grouped into categories depending on the type of medical condition(s) they are used to treat. For example, drugs used to treat a heart condition are listed under the category "Cardiovascular Agents." If you know what your drug is used for, look for the category name in the list. Then, look under the category name for your drug.

- **Alphabetical listing**

If you are not sure what category to look under, you should look for your drug in the Index. The Index provides an alphabetical list of all drugs included in this document. Both brand-name drugs and generic drugs are listed in the Index.

Formulary design

The formulary structure features generic drugs and preferred brand-name drugs.

Drug tier	Helpful tips
Tier 1	Most generic drugs are listed under Tier 1 and have the lowest copayments.
Tier 2	Drugs listed under Tier 2 generally include brand-name drugs and some specialty or high-cost drugs*.

* High-Cost (and some Specialty) drugs are those that cost \$830 or more for up to a 30-day maximum supply.

Please refer to your *Evidence of Coverage* for more information.

Medication tips

What are generic drugs?

Your plan covers both brand-name drugs and generic drugs. A generic drug is approved by the FDA as having the same active ingredient as the brand-name drug. Generally, generic drugs cost less than brand-name drugs.

Are there any restrictions on my coverage?

Some covered drugs may have additional requirements or limits on coverage. These requirements and limits may include:

Prior Authorization (PA)	You or your physician may need to get prior authorization for certain drugs. This means you will need to get approval from Optum Rx before you fill your prescriptions. If you do not get approval, the drug may not be covered.
---------------------------------	--

Quantity Limits (QL)	For certain drugs, there is a limit on the amount of the drug we will cover.
-----------------------------	--

To find out if your drug has any additional requirements or limits, look in the formulary. You can also get more information about restrictions applied to specific covered drugs by visiting our website or by calling Optum Rx. Our contact information, along with the date we last updated the formulary, is shown on the front and back cover pages.

You can ask Optum Rx to make an exception to these restrictions or limits, or for a list of other similar drugs that may treat your health condition. See the section “How do I request an exception to the formulary?” for additional information.

What if my drug is not on the formulary?

If your drug is not included in this formulary (list of covered drugs), you should first contact Optum Rx and ask if your drug is covered. Our contact information is shown on the front and back cover pages.

If your drug is not covered, you have 2 options:

- You can ask Optum Rx for a list of similar drugs that are covered. When you receive the list, show it to your doctor and ask him or her to prescribe a similar drug that is covered.
- You can ask Optum Rx to make an exception and cover your drug. See below for information about how to request an exception.

AlaskaCare offers enhanced supplemental coverage on **some** prescription drugs not normally covered under Medicare Part D and/or Part B. This formulary includes those supplemental medications. Please contact Optum Rx for any questions regarding your enhanced supplemental benefits.

How do I request an exception to the formulary?

You can ask Optum Rx to make an exception to the coverage rules. There are 2 types of exceptions that you can ask us to make:

- You can ask us to cover a drug even if it is not on our formulary. If approved, the drug will be covered at a predetermined cost-sharing level, and you will not be able to ask us to provide the drug at a lower cost-sharing level.
- You can ask us to cover a formulary drug at a lower cost-sharing level. If approved, this would lower the amount you must pay for your drug.

Note: If we grant your request to cover a drug that is not on the formulary, you may not ask us to provide a higher level of coverage for the drug.

Generally, we will only approve your request for an exception if the drug is included on the plan's formulary, or if additional utilization restrictions would not be as effective in treating your condition and/or would cause you to have adverse medical effects.

You should contact Optum Rx for an initial coverage decision for a formulary, tier, or utilization restriction exception.

When you request a formulary, tier, or utilization restriction exception, you must submit a statement from your doctor (or other prescriber) supporting your request.

Generally, we must make our decision within 72 hours of getting your doctor's (or other prescriber's) supporting statement. You can request an expedited (fast) exception if you or your doctor believe that your health could be seriously harmed by waiting up to 72 hours for a decision. If your request to expedite is granted, we must give you a decision no later than 24 hours after we get a supporting statement from your doctor (or other prescriber).

What do I do before I can talk to my doctor about changing my drugs or requesting an exception?

As a new or continuing member in the AlaskaCare Retiree Medicare Prescription Drug Plan, you may be taking drugs that are not on the formulary, not covered under the AlaskaCare enhanced supplemental benefits, or your ability to get it is limited. For example, you may need a prior authorization from us before you can fill your prescription. You should talk to your doctor (or other prescriber) to decide if you should switch to an alternative drug that is covered or request a formulary exception. While you talk to your doctor (or other prescriber) to determine the right course of action for you, the plan may cover your drug in certain cases during the first 90 days you are a member of the plan.

For each of your drugs not on the formulary, under the AlaskaCare enhanced supplemental benefits, or if your ability to get your drugs is limited, we will cover a temporary 30-day supply (unless you have a prescription written for fewer days) when you go to a network pharmacy. After your first 30-day supply, the plan will not pay for these drugs, even if you have been a member of the plan less than 90 days.

If you are a resident of a long-term care facility, the plan will allow you to refill your prescription until you have been provided with a 31-day transition supply, written for as many pills as necessary, unless you have a prescription written for fewer days. The plan will cover more than one refill of these drugs for the first 90 days you are a member of the plan.

The plan will cover a 31-day emergency supply of a drug (unless you have a prescription for fewer days) while you get a formulary exception for the following:

- If you need a drug that is not on the Part D formulary
- If you need a drug that is not covered under the AlaskaCare enhanced supplemental benefits
- If your ability to get your drugs is limited, but you are past the first 90 days of membership in our plan

If you are a current member with a level-of-care change and you need a drug that is not on the plan formulary, or if your ability to get your drugs is limited, the plan will cover a temporary 31-day transition supply (unless you have a prescription written for fewer days) while you seek a formulary exception. If you are in the process of seeking an exception, the plan will consider allowing continued coverage until a decision is made.

For more information

For more detailed information about your prescription drug coverage, please review your other plan materials. If you have questions about the plan, please call Optum Rx. Our contact information, along with the date we last updated the formulary, is shown on the front and back cover pages.

Questions

If you have general questions about Medicare prescription drug coverage: please call Medicare at **1-800-MEDICARE** (1-800-633-4227) 24 hours a day, 7 days a week. TTY users should call **1-877-486-2048**. You may also visit **medicare.gov**.

Reading your formulary

The formulary below provides coverage information about some of your covered drugs on both the Part D and Non-Part D (supplemental wrap) benefits. If you have trouble finding your drug in the list, turn to the Index for assistance.

The first column of the chart lists the drug name. Brand-name drugs are capitalized (e.g., COZAAR), and generic drugs are listed in lower-case italics (e.g., atenolol). The following abbreviations listed in the “Requirements/Limits” column let you know if there are any special requirements for coverage of your drug.

Requirements/Limits	Helpful tips
B/D	This prescription drug has a Part B versus Part D administrative prior authorization requirement. This drug may be covered under Medicare Part B or D depending upon the circumstances. Information may need to be submitted describing the use and setting of the drug to make the determination.
PA	Prior Authorization. Our plan requires you or your physician to get prior authorization for certain drugs. This means you will need to get approval from Optum Rx before you fill your prescriptions. If you do not get approval, your drug may not be covered.
QL	Quantity Limit. For certain drugs, our plan limits the amount of the drug that will be covered.
PV	Preventive medication. This medication may be available at zero copay.
NDS	Non-Extended Days’ Supply. This prescription drugs is not available for an extended days’ supply.
