Mr. Joseph R. Henri  
Commissioner of Administration  
State of Alaska  
Pouch C  
Juneau, Alaska 99801

Dear Commissioner Henri:

At your request, we have completed an actuarial valuation of the Alaska Public Employees' Retirement System as of December 31, 1971, in order to examine the financial status of the System and to determine the Employer contribution rates for the 1972-73 fiscal year.

The results of our valuation, included in this report, are based upon employee data and financial information supplied by your Department and actuarial assumptions and methods chosen by the Actuary.

On the basis of this data and the actuarial method and assumptions described in this report, I certify that, to the best of my knowledge and belief, the attached statements are true and correct.

Respectfully submitted,

Norman S. Losk, FSA  
Actuary

SECTION I

INTRODUCTION

In accordance with your request, we have performed an actuarial valuation of the Alaska Public Employees' Retirement System as of December 31, 1971.

The purposes of the valuation are:

- (a) To examine the status of funding of the System.
- (b) To establish contribution rates for the State of Alaska and all other participating employers.

Sets of valuation results are based upon the benefits of the System which were in effect at the valuation date and benefits which will go into effect on July 1, 1972 if pending legislation is passed.

On the following page you will find summarized the significant results of this valuation with respect to the benefits of the System as it existed on the valuation date.

<u>Employer</u>	<u>Pension Cost</u>		<u>Present Value of All Accrued Benefits</u>	<u>Assets as of 12/31/71</u>	<u>Unfunded Liability or (Surplus)</u>
	<u>Estimated Dollar Amount</u>	<u>Percent of Involved Payroll</u>

Auch Per Sch D. t 9.54 %

It appears that the System will be significantly amended by legislation in the 1972 legislative session. Such amendments would become effective on July 1, 1972. The probable changes in the System which significantly affect valuation results are as follows:

- (a) The normal retirement benefit formula for employees other than Police and Fire employees is increased from:
  - (i) 1% of average monthly compensation (final three year average pay) for each of the first 10 years of service, 1½% of average monthly compensation for each of the next 10 years of service, and 2% of average monthly compensation for each year of service in excess of 20 years.
  - to (ii) 1½% of average monthly compensation for each of the first 10 years of service, 1-3/4% of average monthly compensation for each of the next 10 years of service and 2% of average monthly compensation for each year of service in excess of 20.
- (b) Individuals who terminated prior to July 1, 1972 and who are receiving or are eligible to receive retirement benefits under the System shall receive a minimum benefit of \$10 per year of service.
- (c) The minimum service requirement for eligibility for vesting, non-occupational disability benefits and retirement is reduced from eight years to five years of service.
- (d) The level of employee contributions for those employees other than Police and Fire employees is increased from 3½% of compensation to 4¼% of compensation.

- (e) The single sum non-occupational pre-retirement death benefit is increased by a flat \$1000.
- (f) The maximum contribution level for the State of 8% of covered pay is eliminated.

On the following page you will find summarized the significant results of this valuation with respect to the benefits of the System after the probable amendments.

SECTION II

ANALYSIS OF THE VALUATION

A. Participant Data

You will recall that no valuation was performed last year with respect to the political subdivisions due to substantially incomplete data. Although the data available for this valuation with respect to political subdivisions is more complete than that available for the previous valuation, it is far from being totally complete.

In addition, questions have been raised with respect to the quality of the data available with respect to employees of the State.

We have developed valuations and contribution rates for the State and for each political subdivision based upon the information provided. Where significant information was missing (birthdates, hire dates, salaries, and sex) we made assumptions which we felt were reasonable in relation to the remainder of the data.

There are various types of experience studies which should be performed regularly for this System. Studies of disability, turnover, and mortality experience should be made periodically to test the adequacy of the assumptions to serve as a basis for the revision of such assumptions. The quality of the data provided is at least a partial reason for the fact that such studies have not been performed recently.

It is encouraging that the Department of Administration appears to share my concern with regard to this problem. Hopefully, a solid data base may be established and procedures established for the ongoing maintenance of such data by the time of the next actuarial valuation of the System.

B. Assets of the System

There appears to be a significant movement in the investment of the assets of the System toward a greater involvement in common stocks. This is a move which has been discussed for some time. It is highly encouraging to see this movement taking place.

There are indications that the overall rate of return for the System in the current year will exceed our actuarial assumption of 5%. The continuation of this assumption is indicated.

C. Contribution Rates

Contribution rates have been developed for each of the participating employers based on the existing and the probable revised benefit structures. The general impact of the revisions is to increase contribution rates by 25% to 45%. The impact varies with the age and service characteristics of the covered group and the extent of funding of that group's portion of the System at the valuation date.

The contribution rate developed for the State for the existing benefit structure is virtually identical to the contribution rate developed in the previous valuation. This may be somewhat misleading as to the experience over calendar 1971 in that a change has been made in the manner in which retired lives are accounted for in the actuarial

valuation.

D. Treatment of Retired Lives

In prior years, retirement benefits have been attributable to the employer contribution account of the employer for whom the individual retired. Last year a retired life account was established on a separate and distinct basis. Funds required in that account to fully fund benefits for current retirees are established each year by the actuary and additions may be charged back to employer contribution accounts in accordance with the amounts of benefits attributable to each employer.

Thus, while liabilities for retired lives were recognized by employer in previous actuarial valuations, they were not included in the determination of the employer rates except to the extent that the assets of such employer have been reduced by amounts charged to their accounts to initially establish the retired life accounts.

The value of that retied life account is \$2,247,977 at the valuation date. The value of retired life liabilities are as follows:

(1) Benefits effective at valuation date	\$3,758,262
(2) Benefits after probable amendment	\$5,413,400, <i>incr. due to retroactive benefit</i>

The deficiency in the retired life account should be liquidated by a charge levied against the employer contribution accounts of each employer to which at least one retirement is attributable, in proportion to the relationship of the liabilities of the retirees attributable that employer to the total liabilities for retired lives.

### SECTION III

#### SUMMARY AND CONCLUSION

There is little question that this System is growing rapidly both in terms of participants and in terms of assets.

The investment structure of the System is improving substantially. The expectation is that this will translate into better investment results and better communication of such results.

The quality of actuarial valuation data and the participant records underlying that data is a matter of substantial concern. It is of critical importance that the Administration regularly be provided with the best possible information regarding the costs of the retirement systems which it supports. It is also of critical importance that costs of potential legislative changes to the systems be available on as accurate a basis as possible. This information can properly be provided only if complete and accurate machine-readable records of employee participation in the System are available.

APPENDIX 1

ACTUARIAL METHOD

The actuarial method used in this valuation is known as the Aggregate Method. Under this method, the employer cost is determined as follows:

- (1) The present value of all benefits accrued and expected to be earned in the future are calculated, taking into account expected levels of mortality, turnover, disability, salary increases, and investment performance.
- (2) Such present value of benefits is reduced by the sum of:
  - (a) The assets of the fund and
  - (b) The present value of future employee contributions, taking into account the same items as enumerated in (1) above.

The remainder is the portion of the present value of future benefits to be funded by employer contributions and is called the "Present Value of Future Employer Normal Costs."

- (3) The Employer Normal Cost as a percentage of active life payrolls is determined by dividing the Present Value of Future Employer Normal Costs by the present value of future salaries, calculated taking into account those factors enumerated in item (1) above.

This method effectively spreads the portion of the total projected present value of benefits to be financed by future employer contributions

over the expected future working lifetime of the currently covered group. It has the advantage that the effect of actuarial gains and losses (which arise from actual experience that deviates from the actuarial assumptions used) is automatically spread over this period.

## APPENDIX 2

## ACTUARIAL ASSUMPTIONS

The following assumptions were used as the basis for the valuations included in this report:

- (1) Investment Yield: 5% per annum, net of expenses.
- (2) Assets: Valued at cost.
- (3) Experience: Active Employees
  - (a) Retirement Age - Police & Fire 55 or 20 years service.  
- Others 60 or 30 years service.
  - (b) Disability - See attached Schedule I.
  - (c) Separation - Police and Fire - Schedule IIa  
Others - Schedule IIb
  - (d) Mortality - 1951 Group Annuity Projection C to 1965
  - (e) Earnings Progression - 3-1/2% increase per year.
- (4) Experience: Pensioners and Beneficiaries
  - (a) Mortality - Retired - 1951 Group Annuity Projection "C" to 1965.
  - (b) Disabled - 1944 Disabled Railway Employees Select Mortality Table.
- (5) Loading: None

APPENDIX 5

PUBLIC EMPLOYEES' RETIREMENT SYSTEM  
OF ALASKA

Summary of the System  
as effective on the Valuation Date

1. PLAN

Public Employees' Retirement System of Alaska

2. EFFECTIVE DATE

January 1, 1961

3. AMENDED

April 19, 1961  
April 19, 1962  
February 18, 1964  
May 29, 1964  
July 1, 1964  
May 12, 1966  
April 3, 1968  
July 1, 1968  
July 1, 1970

4. ADMINISTRATION OF PLAN

The Commissioner of Administration is responsible for administration of System, Public Employees Retirement Board adopts rules and regulations to carry out provisions of the Act, Commissioner of Revenue invests the Fund.

5. EMPLOYERS INCLUDED

State of Alaska and any political subdivisions and public or quasi-public organizations thereof (as of December 31,

1971, there were: 16 participating employers in addition to the State).

6. EMPLOYEES INCLUDED

All regular full-time employees of the State and participating political subdivisions, exclusive of those covered by the Alaska Teachers Retirement System, The Alaska Judges System, or any employee on whose behalf the State is making contributions to another Retirement System. Elected officials may elect to participate at their option.

7. SERVICE CONSIDERED

Future:

Credited Service - Uninterrupted employment from last date of hire or 1/1/61, if later, to date of termination, death, or retirement. If an individual earns at least 3 years of credited service after 1/1/61, he obtains credit for all service rendered prior to 1/1/61.

Past:

Service credit for all service with State and Territory prior to January 1, 1961, if the employee completed three years of service after January 1, 1961. Elected official has past service credit only if he pays contributions for all of his service after January 1, 1961. Service with political subdivision prior to effective date included at option of political subdivision.

Break in Future Service:

Any termination. But if employee returns and makes contribution equal to refund paid plus interest, the service before the break is considered.

8. COMPENSATION CONSIDERED

Total compensation during three consecutive calendar years of credited service which yield the highest average monthly compensation (total compensation during period divided by number of months included).

9. EMPLOYER CONTRIBUTIONS

Separate contribution rate for each employer to be:

Amount which would amortize all future liabilities (less value of employee contributions) over the future working lifetime of the covered group.

10. EMPLOYEE CONTRIBUTIONS

Mandatory Employee Contributions:

Police & Fire - 5%

Other - 3½%

Refund at Termination (no vesting):

Return of voluntary and mandatory contributions with interest.

Refund at Death:

If no widows pension payable, return of voluntary and mandatory contributions with interest.

11. NORMAL RETIREMENT BENEFIT

Eligibility:

Age 55 or 20 years, P & F

Age 60 or 30 years, other

Type:

Life only with optional joint and survivor benefit  
(actuarially reduced).

Amount:

1% of first 10 years, 1½% of next 10 years, 2% of years  
in excess of 20 of highest 3 consecutive year average -  
Other. 2% first 10 years, 2½% excess of highest consecu-  
tive 3 year average salary - Police & Fire.

12. EARLY RETIREMENT BENEFIT

Eligibility:

Age 50 and 8 years service - P & F

Age 55 and 8 years service - Other

Type:

Life only

Amount:

Actuarial equivalent of Normal Retirement Benefit based  
on service and compensation to early retirement date.

13. DEFERRED VESTED BENEFIT

Eligibility:

8 Years of service

Type:

Life only or joint and survivor benefit (actuarially reduced).

Amount:

Monthly benefit begins on employee's normal retirement date. Amount determined the same as normal retirement benefit taking into account compensation and service prior to termination.

#### 14. DISABILITY BENEFIT

Occupational Disability:

Eligibility:

No age or service requirements.

Type:

Monthly benefit payable until death or recovery.

Amount:

2/3 of gross monthly compensation - P & F.

Normal Retirement Benefit assuming total service to age 60 or to date, if later, at the current level of compensation and 75% J & S option - Other.

Terminates at Normal Retirement Date with full N.R. benefit commencing.

Non-Occupational Disability:

Eligibility:

8 years of service

Type:

Monthly benefit payable until death or recovery.

Amount:

Same as vested benefit except payments commence immediately.

15. DEATH BENEFIT BEFORE RETIREMENT

Occupational:

No age or service requirements.

Benefit: 75% of occupational disability benefit to spouse - Other. Full pay continues to spouse to Normal Retirement Date with full Normal Retirement Benefit to spouse after Normal Retirement Date - P & F.

After Occupational Disability: 75% of Occupational Disability paid to disabled employee continued to Spouse - Other. Full occupational disability benefit continued to Spouse - P & F.

Non-Occupational:

If no widow benefit is payable, lump sum death benefit of \$100 per completed year of service.

16. DEATH BENEFITS AFTER RETIREMENT

The employee's beneficiary receives a lump sum equal to the excess of his contribution account immediately prior to retirement over the sum of the pension payments previously received by the employee.

17. POST-RETIREMENT PENSION ADJUSTMENT

Commissioner of Administration may recommend post-retirement increases on account of increasing cost of living up to one and one-half percent for each year of retirement.

18. COST-OF-LIVING ALLOWANCE

A retired employee who remains in Alaska is eligible for an additional allowance equal to the increase in benefit that results when his primary Social Security benefit is multiplied by the ratio that the cost of living in Alaska bears to the cost of living in other states of the U.S.

A widow receiving a widow's pension receives three-fourths of this allowance.

19. OPTIONAL EMPLOYEE SAVINGS ACCOUNT

An employee can voluntarily contribute up to 5% of his compensation. This amount is recorded in a separate account and is payable:

- a) in the event of termination before retirement for a reason other than death, as a lump sum to the employee,
- b) in the event of termination on account of death, as a lump sum to the employee's beneficiary,
- c) on retirement, as a lump sum, life annuity on cash refund basis or installments over limited period.

20. OTHER OPTIONAL BENEFITS

An employee at normal retirement or with a deferred vested retirement benefit can elect an actuarially reduced joint and survivor benefit. An employee taking early retirement can elect actuarially equivalent Social Security offset.
