### **Certification of Actuarial Valuation**

Dear Members of The Alaska Retirement Management Board, The Department of Revenue, and The Department of Administration,

This report summarizes the annual actuarial valuation results of the State of Alaska Teachers' Retirement System Defined Contribution Retirement (TRS DCR) Plan as of June 30, 2025 performed by Gallagher Benefit Services, Inc. (Gallagher).

The actuarial valuation is based on financial information provided in the financial statements audited by KPMG LLP, member data provided by the Division of Retirement and Benefits, and medical enrollment data provided by the healthcare claims administrator (Aetna), as summarized in this report. The benefits considered are those delineated in Alaska statutes effective June 30, 2025. The actuary did not verify the data submitted, but did perform tests for consistency and reasonableness.

All costs, liabilities, and other factors under TRS DCR were determined in accordance with generally accepted actuarial principles and procedures. An actuarial cost method is used to measure the actuarial liabilities which we believe is reasonable. Gallagher is solely responsible for the actuarial data and actuarial results presented in this report. This report fully and fairly discloses the actuarial position of TRS DCR as of June 30, 2025.

TRS DCR is funded by Employer Contributions in accordance with the funding policy adopted by the Alaska Retirement Management Board (Board). The funding objective for TRS DCR is to pay required contributions that remain level as a percent of TRS DCR compensation. The Board has also established a funding policy objective that the required contributions be sufficient to pay the Normal Costs of active plan members, plan expenses, and amortize the Unfunded Actuarial Accrued Liability as a level percent of TRS DCR compensation over closed layered 25-year periods. This objective is currently being met and is projected to continue to be met as required by the Alaska State statutes. Absent future gains/losses and/or changes in actuarial assumptions/methods, actuarially determined contributions are expected to remain level as a percent of pay and the funded status of the occupational death & disability trust and the retiree medical trust are expected to remain above 100%.

The Board and staff of the State of Alaska may use this report for the review of the operations of TRS DCR. Use of this report for any other purpose or by anyone other than the Board or staff of the State of Alaska may not be appropriate and may result in mistaken conclusions due to failure to understand applicable assumptions, methodologies, or inapplicability of the report for that purpose. Because of the risk of misinterpretation of actuarial results, Gallagher recommends requesting its advanced review of any statement to be based on information contained in this report. Gallagher will accept no liability for any such statement made without its prior review.

Future actuarial measurements may differ significantly from current measurements due to plan experience differing from that anticipated by the actuarial assumptions, changes in assumptions, changes expected as part of the natural operation of the methodology used for these measurements, and changes in plan provisions or applicable law. In particular, retiree group benefits models necessarily rely on the use of approximations and estimates and are sensitive to changes in these approximations and estimates. Small variations in these approximations and estimates may lead to significant changes in actuarial measurements. An analysis of the potential range of such future differences is beyond the scope of this valuation.

In our opinion, the actuarial assumptions used are reasonable, taking into account the experience of the plan and reasonable long-term expectations, and represent our best estimate of the anticipated long-term experience under the plan. In our professional judgment, the combined effect of the assumptions is expected to have no significant bias. The actuary performs an analysis of plan experience periodically and recommends changes if, in the opinion of the actuary, assumption changes are needed to more accurately reflect expected future experience. The last full experience analysis was performed for the period July 1, 2017 to June 30, 2021. Based on that experience study, the Board adopted new assumptions effective beginning with the June 30, 2022 valuation to better reflect expected future experience. Based on our annual analysis of recent claims experience, changes were made to the healthcare per capita claims cost rates effective June 30, 2025 to better reflect expected future healthcare experience.

In June 2025, the Board adopted a new payroll growth assumption of 1.00% effective beginning with the June 30, 2025 valuation. The payroll growth assumption does not affect the plan's liabilities. It is used to amortize the unfunded liability on a level percent of payroll basis. The prior payroll growth assumption was 2.75%. The Board adopted the new assumption to better match recent payroll growth experience.

A summary of the actuarial assumptions and methods used in this actuarial valuation is shown in Sections 4.2 and 4.3. We certify that the assumptions and methods used for funding purposes, as described in Sections 4.2 and 4.3 of this report, meet the requirements of all applicable Actuarial Standards of Practice.

Actuarial Standard of Practice No. 27 (ASOP 27) requires the actuary to disclose the information and analysis used to support the actuary's determination that the assumptions selected by the plan sponsor do not significantly conflict with those that, in the actuary's professional judgment, are reasonable for the purpose of the measurement. Gallagher provides advice on reasonable assumptions when performing periodic experience studies. The Board selects the assumptions to be used in the valuation, and the signing actuaries review the assumptions annually through discussions with staff and the Board, and analysis of actuarial experience.

In the case of the Board's selected expected return on assets (EROA), the signing actuaries have used economic information and tools provided by Gallagher's Investments Practice. A spreadsheet tool created by this practice converts averages, standard deviations, and correlations from Gallagher's Capital Market Assumptions that are used for stochastic forecasting into approximate percentile ranges for the arithmetic and geometric average returns. The EROA spreadsheet tool is intended to suggest possible reasonable ranges for the expected return on assets without attempting to predict or select a specific best estimate rate of return. It takes into account the duration of investment and the target allocation of assets in the portfolio to various asset classes.

Based on the actuaries' analysis, including consistency with other assumptions used in the valuation, the percentiles generated by the EROA spreadsheet tool described above, and review of actuarial gain/loss analysis, the signing actuaries believe the assumptions, in their professional judgment, do not significantly conflict with what are reasonable for the purpose of the measurement.

### ACFR Information

We have prepared the following information in this report for the Actuarial Section and Statistical Section of the ACFR: (i) member data tables in Section 3; (ii) summary of actuarial assumptions in Section 4.3; and (iii) historical information in Section 5.

Governmental Accounting Standards Board (GASB) Statement No. 74 (GASB 74) was effective for TRS DCR beginning with fiscal year ending June 30, 2017. Please see our separate GASB 74 report for other information needed for the ACFR.

### Risk Information

Actuarial Standard of Practice No. 51 (ASOP 51) applies to actuaries performing funding calculations related to a pension plan. ASOP 51 does not apply to actuaries performing services in connection with other post-employment benefits, such as medical benefits. Accordingly, ASOP 51 does not apply to the retiree medical portion of TRS DCR. We also believe ASOP 51 does not apply to the occupational death & disability portion of TRS DCR. Therefore, information related to ASOP 51 is not included in this report. However, it may be beneficial to review the ASOP 51 information provided in the TRS valuation report for information on risks that may also relate to the occupational death & disability benefits provided by this plan.

### Use of Models

Actuarial Standard of Practice No. 56 (ASOP 56) provides guidance to actuaries performing actuarial services that involve designing, developing, selecting, modifying, using, reviewing, or evaluating models. In addition to the EROA spreadsheet tool disclosed above, Gallagher uses third-party software to perform annual actuarial valuations and projections. The model is intended to calculate the liabilities associated with the provisions of the plan using data and assumptions as of the measurement date under the funding methods specified in this report. Gallagher also uses an internally developed model that applies applicable funding methods and policies to the liabilities derived from the third-party software and other inputs, such as plan assets and contributions, to generate many of the exhibits found in this report.

Gallagher maintains an extensive review process in which the results of the liability calculations are checked using detailed sample life output, changes from year to year are summarized by source, and significant deviations from expectations are investigated. Other funding outputs and the internal model are similarly reviewed in detail and at a higher level for accuracy, reasonability, and consistency with prior results. Gallagher also reviews the third-party model when significant changes are made to the software. This review is performed by experts within Gallagher who are familiar with applicable funding methods, as well as the manner in which the model generates its output. If significant changes are made to the internal model, extra checking and review are completed.

Gallagher used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan, and to reflect the different Medicare coordination methods between the two plans. The manual rate models are intended to provide benchmark data and pricing capabilities, calculate per capita costs, and calculate actuarial values of different commercial health plans. Gallagher relied on the models, which were developed using industry data by actuaries and consultants at OptumInsight.

This report was prepared under our supervision and in accordance with all applicable Actuarial Standards of Practice. # Executive Summary

## Overview

The State of Alaska Teachers' Retirement System Defined Contribution Retirement (TRS DCR) Plan provides occupational death & disability and retiree medical benefits to teachers and other eligible members hired after June 30, 2006 or who have elected participation in this plan. The Commissioner of the Department of Administration is responsible for administering the plan. The Alaska Retirement Management Board (Board) has fiduciary responsibility over the assets of the plan. This report presents the results of the actuarial valuation of TRS DCR as of the valuation date of June 30, 2025.

## Purpose

An actuarial valuation is performed on the plan annually as of the end of the fiscal year. The main purposes of the actuarial valuation detailed in this report are:

1. To determine the Employer contribution necessary to meet the Board's funding policy for the plan;
2. To disclose the funding assets and liability measures as of the valuation date;
3. To review the current funded status of the plan and assess the funded status as an appropriate measure for determining actuarially determined contributions;
4. To compare actual and expected experience under the plan during the last fiscal year; and
5. To report trends in contributions, assets, liabilities, and funded status over the last several years.

The actuarial valuation provides a "snapshot" of the funded position of TRS DCR based on the plan provisions, membership data, assets, and actuarial methods and assumptions as of the valuation date.

## Funded Status

Where presented, references to "funded ratio" and "unfunded actuarial accrued liability" typically are measured on an actuarial value of assets basis. It should be noted that the same measurements using market value of assets would result in different funded ratios and unfunded accrued liabilities. Moreover, the funded ratio presented is appropriate for evaluating the need and level of future contributions but makes no assessment regarding the funded status of the plan if the plan were to settle (i.e., purchase annuities) for a portion or all of its liabilities.

| Funded Status as of June 30 (\$ in thousands)            | 2024          | 2025          |
|----------------------------------------------------------|---------------|---------------|
| <b>Occupational Death &amp; Disability</b>               |               |               |
| a. Actuarial Accrued Liability                           | \$ 165        | \$ 140        |
| b. Valuation Assets                                      | <u>8,533</u>  | <u>9,731</u>  |
| c. Unfunded Actuarial Accrued Liability, (a) - (b)       | \$ (8,368)    | \$ (9,591)    |
| d. Funded Ratio based on Valuation Assets, (b) ÷ (a)     | 5,171.5%      | 6,950.7%      |
| e. Fair Value of Assets                                  | \$ 8,499      | \$ 9,879      |
| f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a) | 5,150.9%      | 7,056.4%      |
| <b>Retiree Medical</b>                                   |               |               |
| a. Actuarial Accrued Liability                           | \$ 65,338     | \$ 76,563     |
| b. Valuation Assets                                      | <u>87,558</u> | <u>99,255</u> |
| c. Unfunded Actuarial Accrued Liability, (a) - (b)       | \$ (22,220)   | \$ (22,692)   |
| d. Funded Ratio based on Valuation Assets, (b) ÷ (a)     | 134.0%        | 129.6%        |
| e. Fair Value of Assets                                  | \$ 87,241     | \$ 100,828    |
| f. Funded Ratio based on Fair Value of Assets, (e) ÷ (a) | 133.5%        | 131.7%        |

# Executive Summary

The key reasons for the change in the funded status are explained below. The funded status for healthcare benefits is not necessarily an appropriate measure to confirm that assets are sufficient to settle health plan obligations as there are no available financial instruments for purchase. Future experience is likely to vary from assumptions so there is potential for actuarial gains or losses.

## 1. Investment Experience

The asset valuation method recognizes 20% of the investment gain or loss each year, for a period of five years. The FY25 investment return based on fair value of assets was approximately 10.8% compared to the expected investment return of 7.25% (net of investment expenses). This resulted in a market asset gain of \$309,000 (occupational death & disability) and \$3,191,000 (retiree medical). Due to the recognition of investment gains and losses over a 5-year period, the FY25 investment return based on actuarial value of assets was approximately 8.7%, which resulted in an actuarial asset gain of \$124,000 (occupational death & disability) and \$1,278,000 (retiree medical).

## 2. Salary Increases

Salary increases for continuing active members during FY25 were slightly higher than expected based on the valuation assumptions, resulting in a small liability loss of \$2,000.

## 3. Demographic Experience

The number of active members increased 0.4% from 6,209 at June 30, 2024 to 6,231 at June 30, 2025. The average age of active members increased from 42.96 to 43.46 and average credited service increased from 6.90 to 7.31 years.

The demographic experience gains/losses are shown on page 5.

## 4. Retiree Medical Claims Experience

Please refer to the State of Alaska Teachers' Retirement System (TRS) Defined Benefit Plan Actuarial Valuation Report as of June 30, 2025 for a full description of the assumptions and costs of the retiree medical plan. Adjustments to these costs and assumptions are described in this report.

The recent claims experience described in Section 4.2 of this report (Section 5.2 of the TRS DB report) created an actuarial loss of \$1,417,000. The EGWP subsidy received by the plan during FY25 was \$74,000, as compared to the expected EGWP subsidy for FY25 of \$93,000.

## 5. Changes in Methods Since the Prior Valuation

There were no changes in actuarial methods since the prior valuation.

## 6. Changes in Assumptions Since the Prior Valuation

Healthcare claim costs are updated annually as described in Section 4.2. The effects of these assumption changes are shown on page 5.

The amounts included in the Normal Cost for administrative expenses were updated based on the last two years of actual administrative expenses paid from plan assets.

In June 2025, the Board adopted a new payroll growth assumption of 1.00% effective beginning with the June 30, 2025 valuation. The prior payroll growth assumption was 2.75%. The Board adopted the new assumption to better match recent payroll growth experience.

There were no other changes in actuarial assumptions since the prior valuation.

## 7. Changes in Benefit Provisions Since the Prior Valuation

There have been no changes in benefit provisions valued since the prior valuation.

# Executive Summary

## Comparative Summary of Contribution Rates

|                                                                   | FY 2027        | FY 2028        |
|-------------------------------------------------------------------|----------------|----------------|
| <b>Occupational Death &amp; Disability</b>                        |                |                |

<sup>1</sup> FY28 contribution rates will be adopted by the Board at the September 2026 meeting.

# Executive Summary

## Summary of Actuarial Accrued Liability Gain/(Loss)

The following table shows the FY25 gain/(loss) on actuarial accrued liability as of June 30, 2025 (\$ in thousands):

|                                          | Occupational<br>Death &<br>Disability | Retiree<br>Medical |
|------------------------------------------|---------------------------------------|--------------------|
| Retirement Experience                    | \$ 0                                  | \$ 118             |
| Termination Experience                   | (6)                                   | 1,816              |
| Disability Experience                    | 289                                   | (54)               |
| Active Mortality Experience              | 130                                   | 47                 |
| Inactive Mortality Experience            | (1)                                   | (32)               |
| Salary Increases                         | (2)                                   | N/A                |
| New Entrants                             | 1                                     | (633)              |
| Rehires                                  | 1                                     | (2,928)            |
| Metcalfe Transfers <sup>1</sup>          | 0                                     | 50                 |
| Benefit Payments Different than Expected | 15                                    | 217                |
| Per Capita Claims Cost                   | N/A                                   | (1,417)            |
| Programming Changes <sup>2</sup>         | N/A                                   | 166                |
| Miscellaneous <sup>3</sup>               | <u>1</u>                              | <u>217</u>         |
| Total                                    | \$ 428                                | \$ (2,433)         |

---

<sup>1</sup> These liability gains, which may round to zero when expressed in thousands of dollars, were offset by amounts (\$1K OD&D and \$12K Retiree Medical) that were transferred in FY25 to the DB trusts on behalf of Metcalfe transfers from DCR to DB.

<sup>2</sup> Includes adjustments to the participation assumption to use part-time service accrual for part-time employees.

<sup>3</sup> Includes the effects of various data changes that are typical when new census data is received for the annual valuation, as well as other items that do not fit neatly into any of the other categories.

| <b>Total</b>                       |                     |                 |          | <b>\$ (22,692)</b> | <b>\$ (1,777)</b>         |

<sup>1</sup> The net effect of changing assumptions was less than \$1,000. The demographic assumption changes decreased liability by \$133,000 and the economic assumptions changes increased the liability by \$133,000. Therefore, the net effect of all assumptions changes is \$0 for amortization purposes.

<sup>1</sup> 125 participants are expected to receive retiree medical benefits in a different plan and are included for OD&D benefits only.

<sup>2</sup> 126 participants are expected to receive retiree medical benefits in a different plan and are included for OD&D benefits only.

## 3 Member Data

### 3.4 Schedule of Active Member Data

| Valuation Date | Number | Annual Earnings (000's) | Annual Average Earnings | Percent Increase in Average Earnings | Number of Participating Employers |
|----------------|--------|-------------------------|-------------------------|--------------------------------------|-----------------------------------|
| June 30, 2025  | 6,231  | \$ 533,245              | \$ 85,579               | 5.6%                                 | 57                                |
| June 30, 2024  | 6,209  | 503,409                 | 81,077                  | 3.8%                                 | 57                                |
| June 30, 2023  | 5,877  | 459,105                 | 78,119                  | 1.5%                                 | 57                                |
| June 30, 2022  | 5,688  | 437,728                 | 76,956                  | 3.9%                                 | 57                                |
| June 30, 2021  | 5,521  | 408,805                 | 74,045                  | 4.1%                                 | 57                                |
| June 30, 2020  | 5,332  | 379,201                 | 71,118                  | 2.2%                                 | 57                                |
| June 30, 2019  | 4,998  | 347,957                 | 69,619                  | 2.2%                                 | 57                                |
| June 30, 2018  | 4,915  | 334,803                 | 68,119                  | 2.4%                                 | 57                                |
| June 30, 2017  | 4,694  | 312,347                 | 66,542                  | 2.0%                                 | 57                                |
| June 30, 2016  | 4,383  | 285,854                 | 65,219                  | 2.5%                                 | 58                                |

Total and average annual earnings ("valuation pay") are the annualized earnings for the fiscal year ending on the valuation date.

## 3 Member Data

### 3.5 Active Member Payroll Reconciliation (\$ in thousands)

| Payroll Field                                          | Payroll Data |
|--------------------------------------------------------|--------------|
| a) DRB actual reported salaries FY25 in employer list  | \$ 589,746   |
| b) DRB actual reported salaries FY25 in valuation data | 525,252      |
| c) Annualized valuation data                           | 533,245      |
| d) Valuation payroll as of June 30, 2025               | 558,990      |
| e) Rate payroll for FY26                               | 554,764      |

- 
- a) Actual reported salaries from DRB employer listing showing all payroll paid during FY25, including those who were not active as of June 30, 2025
  - b) Payroll from valuation data for people who are in active status as of June 30, 2025
  - c) Payroll from (b) annualized for both new entrants and part-timers
  - d) Payroll from (c) with one year of salary scale applied to estimate salaries payable for the upcoming year
  - e) Payroll from (d) with the part-timer annualization removed

## 4 Basis of the Actuarial Valuation

### 4.1 Summary of Plan Provisions

#### Effective Date

July 1, 2006, with amendments through June 30, 2025.

#### Administration of Plan

The Commissioner of Administration or the Commissioner's designee is the administrator of the Plan. The Attorney General of the state is the legal counsel for the Plan and shall advise the administrator and represent the Plan in legal proceedings.

The Alaska Retirement Management Board prescribes policies, adopts regulations, invests the funds, and performs other activities necessary to carry out the provisions of the Plan.

#### Employers Included

Currently, there are 57 employers participating in TRS DCR, including the State of Alaska, 53 school districts, and three other eligible organizations.

#### Membership

An employee of a participating employer who first enters service on or after July 1, 2006, or a member of the defined benefit plan who works for an employer who began participation on or after July 1, 2006, and meets the following criteria is a member in the Plan:

- Permanent full-time or part-time elementary or secondary teachers, school nurses, or a person in a position requiring a teaching certificate as a condition of hire in a public school of the State of Alaska, the Department of Education and Early Development, or in the Department of Labor and Workforce Development.
- Full-time or part-time teachers at the University of Alaska or persons occupying full-time administrative positions requiring academic standing who are not in the University's Optional Retirement Plan.

Members can convert to TRS DCR if they are an eligible non-vested member of the TRS defined benefit plan whose employer consents to transfers to the defined contribution plan and they elect to transfer his or her account balance to TRS DCR.

#### Member Contributions

Other than the member-paid premiums discussed later in this section, there are no member contributions for the occupational death & disability and retiree medical benefits.

## 4 Basis of the Actuarial Valuation

### Occupational Death Benefits

- Benefit is 40% of the member's salary in the month in which the member dies.
- A survivor's pension is increased by 50% of the cost-of-living increase in the preceding calendar year or 6%, whichever is less, if the recipient is at least age 60 on July 1, or under age 60 if the recipient has been receiving TRS benefits for at least 8 years as of July 1.
- Benefits cease when the member would have become eligible for normal retirement.
- The period during which the survivor is receiving benefits is counted as service credit toward retiree medical benefits.
- No subsidized retiree medical benefits are provided until the member would have been eligible for normal retirement. The surviving spouse's premium is 100% of the estimated cost until the member would have been Medicare eligible. Medicare-eligible premiums follow the service-based schedule.

### Occupational Disability Benefits

- Benefit is 40% of salary at the time of termination due to disability.
- The disability benefit is increased by 75% of the cost-of-living increase in the preceding calendar year or 9%, whichever is less.
- Member earns service while on occupational disability.
- Benefits cease when the member becomes eligible for normal retirement at Medicare-eligible age and 10 years of service, or at any age with 30 years of service.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's premium is 100% of the estimated cost until they are Medicare eligible. Medicare-eligible premiums follow the service-based schedule.

## 4 Basis of the Actuarial Valuation

### Retiree Medical Benefits

- Member must retire directly from the plan to be eligible for retiree medical coverage. Normal retirement eligibility is the earlier of a) 30 years of service or b) Medicare eligible and 10 years of service.
- No subsidized retiree medical benefits are provided until normal retirement eligibility. The member's and any covered dependent's premium is 100% until the member is Medicare eligible. Upon the member's Medicare-eligibility, the required contribution will follow the service-based schedule shown below.
- Coverage cannot be denied except for failure to pay premium.
- Members who are receiving disability benefits or survivors who are receiving monthly survivor benefits are not eligible until the member meets, or would have met if he/she had lived, the normal retirement eligibility requirements.
- The following is a summary of the medical benefit design adopted in July 2016. The plan description below is used for valuation purposes and indicates participant cost-sharing. Please refer to the benefit handbook for more details.

| Plan Design Feature                                                      | In-Network <sup>1</sup>                                                 | Out-of-Network <sup>1 2</sup> |
|--------------------------------------------------------------------------|-------------------------------------------------------------------------|-------------------------------|
| Deductible (single / family)                                             | \$300 / \$600                                                           |                               |
| Medical services (participant share)                                     | 20%                                                                     | 40%                           |
| Emergency Room Copay (non-emergent use)                                  | \$100                                                                   | \$100                         |
| Medical Out-of-Pocket Maximum<br>(single / family, including deductible) | \$1,500 / \$3,000                                                       | \$3,000 / \$6,000             |
| Medicare Coordination                                                    | Exclusion                                                               | Exclusion                     |
| Pharmacy                                                                 | No Deductible                                                           | No Deductible                 |
| Retail Generic (per 30-day fill)                                         | 20% \$10 min / \$50 max                                                 | 40%                           |
| Retail Non-Formulary Brand (per 30-day fill)                             | 25% \$25 min / \$75 max                                                 |                               |
| Retail Formulary Brand (per 30-day fill)                                 | 35% \$80 min / \$150 max                                                |                               |
| Mail-Order Generic                                                       | \$20 copay                                                              | 40%                           |
| Mail-Order Non-Formulary Brand                                           | \$50 copay                                                              |                               |
| Mail-Order Formulary Brand                                               | \$100 copay                                                             |                               |
| Pharmacy Out-of-Pocket Max (single / family)                             | \$1,000 / \$2,000                                                       |                               |
| Medicare Pharmacy Arrangement                                            | Retiree Drug Subsidy /<br>Employer Group Waiver Plan effective 1/1/2019 |                               |
| Wellness / Preventative                                                  | 100% covered, not<br>subject to deductible                              | 20%, after deductible         |

<sup>1</sup> Section 1.1 of the AlaskaCare Defined Contribution Retiree Benefit Plan states that this health plan shall be updated from time to time to reflect changes in benefits, including annual adjustments to the premium, deductible, coinsurance, medical out-of-pocket limit, and prescription drug out-of-pocket limit.

<sup>2</sup> Out-of-Network applies only to non-Medicare eligible participants.

## 4 Basis of the Actuarial Valuation

- Gallagher used manual rate models to determine relative plan values for the defined benefit (DB) retiree medical plan and the DCR retiree medical plan outlined above. We applied the ratio of the DCR retiree medical plan value to the DB retiree medical plan value to the per capita costs determined for each of pre/post-Medicare medical and pharmacy benefits to estimate corresponding values for the DCR retiree medical plan design. These factors are noted in Section 4.3. We further adjusted the Medicare medical manual rate to reflect the Medicare coordination method adopted. We reflect estimated discounts and pharmacy rebates in the defined benefit medical cost so no further adjustment was needed for the DCR retiree medical plan. The medical network differential is reflected in the relative plan value adjustments.
- Estimated CY26 reimbursements under EGWP were provided by Segal Consulting, who worked with the EGWP administrator (Optum) to develop those estimates. Estimated reimbursements from FY22 through FY26 were blended, with higher weight given to more recent years, to determine the smoothed FY26 and FY27 reimbursements.
- Starting in 2022, prior authorization is required for certain specialty medications. There is no change to the medications that are covered by the plan.
- The retiree medical plan's coverage is supplemental to Medicare. Medicare coordination is described in the DCR Plan Handbook, referred to in the industry as exclusion coordination: Medicare payment is deducted from the Medicare allowable expense and plan parameters are applied to the remaining amount. Starting in 2019, the prescription drug coverage is through a Medicare Part D EGWP arrangement.
- The premium for Medicare-eligible retirees is based on the member's years of service. The percentage of premium paid by the member is shown below.

| Years of Service | Premium Paid by Member |
|------------------|------------------------|
| < 15             | 30%                    |
| 15 - 19          | 25%                    |
| 20 - 24          | 20%                    |
| 25 - 29          | 15%                    |
| 30+              | 10%                    |

- The premium for dependents who are not eligible for Medicare aligns with the member's subsidy. While a member is not Medicare-eligible, premiums are 100% of the estimated cost.
- Members have a separate defined contribution Health Reimbursement Arrangement account, which is not reflected in this valuation, that can be used to pay for premiums or other medical expenses.
- For valuation purposes, retiree premiums were assumed to equal the percentages outlined in the table above times the age-related plan costs. Future premiums calculated and charged to DCR participants will need to be determined reflecting any appropriate adjustments to the defined benefit (DB) plan data because current DB premiums were determined using information based on enrollment with members who have double coverage.
- Coverage will continue for surviving spouses of covered retired members.

### Changes in Benefit Provisions Valued Since the Prior Valuation

There were no changes in benefit provisions since the prior valuation.

## 4 Basis of the Actuarial Valuation

### 4.2 Description of Actuarial Methods and Valuation Procedures

The funding method used in this valuation was adopted by the Board in October 2006, and was modified as part of the experience study for the period July 1, 2013 to June 30, 2017. The asset smoothing method used to determine valuation assets was implemented effective June 30, 2006.

Benefits valued are those delineated in Alaska State statutes as of the valuation date. Changes in State statutes effective after the valuation date are not taken into consideration in setting the assumptions and methods.

#### Actuarial Cost Method

Liabilities and contributions shown in the report are computed using the Entry Age Normal Actuarial Cost Method, level percent of pay. Each year's difference between actual and expected unfunded actuarial accrued liability is amortized over 25 years as a level percent of expected payroll.

Cost factors designed to produce annual costs as a constant percentage of each member's expected compensation in each year for death & disability benefits and retiree medical benefits, from the assumed entry age to the last age with a future benefit, were applied to the projected benefits to determine the normal cost (the portion of the total cost of the plan allocated to the current year under the method). The normal cost is determined by summing intermediate results for active members and determining an average normal cost rate which is then related to the total TRS DCR payroll of active members. The actuarial accrued liability for active members (the portion of the total cost of the plan allocated to prior years under the method) was determined as the excess of the actuarial present value of projected benefits over the actuarial present value of future normal costs.

The actuarial accrued liability for beneficiaries and disabled members currently receiving benefits (if any) was determined as the actuarial present value of the benefits expected to be paid. No future normal costs are payable for these members.

The actuarial accrued liability under this method at any point in time is the theoretical amount of the fund that would have been accumulated had annual contributions equal to the normal cost been made in prior years (it does not represent the liability for benefits accrued to the valuation date). The unfunded actuarial accrued liability is the excess of the actuarial accrued liability over the actuarial value of plan assets measured on the valuation date.

Under this method, experience gains or losses (i.e., decreases or increases in accrued liabilities attributable to deviations in experience from the actuarial assumptions) adjust the unfunded actuarial accrued liability.

#### Valuation of Assets

Effective June 30, 2006, the asset valuation method recognizes 20% of the investment gain or loss in each of the current and preceding four years. This method was phased in over five years. Fair Value of Assets was \$0 as of June 30, 2006. All assets are valued at fair value. Assets are accounted for on an accrued basis and are taken directly from financial statements audited by KPMG LLP. Valuation assets are constrained to a range of 80% to 120% of the fair value of assets.

#### Changes in Methods Since the Prior Valuation

There were no changes in the asset or valuation methods since the prior valuation.

## 4 Basis of the Actuarial Valuation

### Valuation of Retiree Medical and Prescription Drug Benefits

The methodology used for the valuation of the retiree medical benefits is described in Section 5.2 of the State of Alaska Teachers' Retirement System Defined Benefit Plan Actuarial Valuation Report as of June 30, 2025.

Starting in 2022, certain common preventive benefits are covered for the DB plan. Preventive benefits were already covered under the DCR plan, so the pre-65 DCR medical adjustment factor referenced below was increased from 3.1% to 4.4%.

Due to the lack of experience for the DCR retiree medical plan, base claims costs are based on those described in the actuarial valuation as of June 30, 2025 for the Defined Benefit (DB) retiree medical plan covering TRS and PERS. The DB rates were used with some adjustments. The claims costs were adjusted to reflect the differences between the DCR medical plan and the DB medical plan. These differences include network steerage, different coverage levels, different Medicare coordination for medical benefits, and an indexing of the retiree out-of-pocket dollar amounts. To account for higher initial copays, deductibles, and out-of-pocket limits, projected FY26 claims costs were reduced 4.4% for pre-Medicare medical claims, 3.1% for Medicare medical claims, and 8.9% for prescription drugs. In addition, to account for the difference in Medicare coordination, projected FY26 medical claims costs for Medicare eligible retirees were further reduced 29.5%.

No implicit subsidies are assumed. Employees projected to retire with 30 years of service prior to Medicare are valued with commencement deferred to Medicare eligibility, because those members will be required to pay the full plan premium prior to Medicare. Explicit subsidies for disabled and normal retirement are determined using the plan-defined percentages of age-related total projected plan costs, again with no implicit subsidy assumed.

The State transitioned to an Employer Group Waiver Program (EGWP) for DCR participants effective January 1, 2019. The estimated 2026 reimbursements under EGWP were provided by Segal Consulting, who worked with the EGWP administrator (Optum) to develop those estimates. The estimated reimbursements under EGWP from FY22 through FY26 were trended to FY26 and then blended to develop the EGWP subsidies for the June 30, 2025 valuation. The first-year trend rate applied to EGWP per capita costs was also adjusted to reflect the increase in EGWP subsidies from CY25 to CY26.

## 4 Basis of the Actuarial Valuation

### Healthcare Reform

Healthcare Reform legislation passed on March 23, 2010 included several provisions with potential implications for the State of Alaska Retiree Health Plan liability. Gallagher evaluated the impact due to these provisions.

Because the State plan is retiree-only, not all provisions are required. Unlimited lifetime benefits and dependent coverage to age 26 are two of these provisions. The adopted DCR plan does not place lifetime limits on benefits, but does restrict dependent child coverage.

The Further Consolidated Appropriations Act, 2020 passed in December 2019 repealed several healthcare-related taxes, including the Cadillac Tax.

The Tax Cuts and Jobs Act passed in December 2017 included the elimination of the individual mandate penalty and changed the inflation measure for purposes of determining the limits for the High Cost Excise Tax to use chained CPI. It is our understanding the law does not directly impact other provisions of the ACA. While the nullification of the ACA's individual mandate penalty does not directly impact employer group health plans, it could contribute to the destabilization of the individual market and increase the number of uninsured. Such destabilization could translate to increased costs for employers. We have considered this when setting our healthcare cost trend assumptions and will continue to monitor this issue.

The Inflation Reduction Act (IRA) was signed into law on August 16, 2022. The law contains several provisions that are expected to impact Alaska's Medicare prescription drug plan (EGWP) due to design and funding changes, the most meaningful of which occurred in 2025. The IRA is also expected to bend the trend curve through price control measures such as HHS's ability to negotiate prices for older, high-cost single source brand drugs (first effective in 2026) and through the imposition of rebates for drugs that increase in excess of inflation (first effective in 2023). We have adjusted the EGWP subsidy and the first-year trend that is applied to these subsidies for the June 30, 2025 valuation based on estimated reimbursements provided by Segal Consulting. As further guidance and projections regarding the impact of the IRA become available, updates to these assumptions may be made for future measurement dates if deemed appropriate.

We have not identified any other specific provisions of healthcare reform or its potential repeal that would be expected to have a significant impact on the measured obligation. We will continue to monitor legislative activity.

## 4 Basis of the Actuarial Valuation

### 4.3 Summary of Actuarial Assumptions

The demographic and economic assumptions used in the June 30, 2025 valuation are described below. Unless noted otherwise, these assumptions were adopted by the Board at the June 2022 meeting based on the experience study for the period July 1, 2017 to June 30, 2021.

#### Investment Return

7.25% per year, net of investment expenses.

#### Salary Scale

Salary scale rates based on the 2017-2021 actual experience (see Table 1).

Inflation – 2.50% per year.

Productivity – 0.25% per year.

#### Payroll Growth

1.00% per year.

#### Total Inflation

Total inflation as measured by the Consumer Price Index for urban and clerical workers for Anchorage is assumed to increase 2.50% annually.

#### Mortality (Pre-Commencement)

Mortality rates based on the 2017-2021 actual experience, to the extent the experience was statistically credible.

- Occ D&D: Pub-2010 Teachers Employee table, amount-weighted, and projected with MP-2021 generational improvement.
- Healthcare: Pub-2010 Teachers Employee table, headcount-weighted, and projected with MP-2021 generational improvement.

Deaths are assumed to result from occupational causes 15% of the time.

#### Mortality (Post-Commencement)

Mortality rates based on the 2017-2021 actual experience, to the extent the experience was statistically credible.

Retiree mortality in accordance with the following tables:

- Occ D&D: 97% of male and 97% of female rates of the Pub-2010 Teachers Retiree table, amount-weighted, and projected with MP-2021 generational improvement.
- Healthcare: 98% of male and 100% of female rates of the Pub-2010 Teachers Retiree table, headcount-weighted, and projected with MP-2021 generational improvement.

Beneficiary mortality in accordance with the following tables. These tables are applied only after the death of the original member.

- Occ D&D: 100% of male and 95% of female rates of the Pub-2010 Contingent Survivor table, amount-weighted, and projected with MP-2021 generational improvement.
- Healthcare: 100% of male and 94% of female rates of the Pub-2010 Contingent Survivor table, headcount-weighted, and projected with MP-2021 generational improvement.

## 4 Basis of the Actuarial Valuation

### Turnover

Select and ultimate rates based on the 2017-2021 actual experience (see Table 2).

### Disability

No changes to the incidence rates from the prior valuation due to insufficient 2017-2021 actual experience (see Table 3). For retiree medical benefits, the disability rates cease once a member is eligible for retirement. However, the disability rates continue after retirement eligibility for occupational death & disability benefits.

Disabilities are assumed to be occupational 15% of the time.

Post-disability mortality in accordance with the following tables:

- Occ D&D: Pub-2010 Non-Safety Disabled Retiree table, amount-weighted, and projected with MP-2021 generational improvement.
- Healthcare: Pub-2010 Non-Safety Disabled Retiree table, headcount-weighted, and projected with MP-2021 generational improvement.

### Retirement

Retirement rates based on the 2017-2021 actual experience (see Table 4).

### Spouse Age Difference

Male members are assumed to be three years older than their wives. Female members are assumed to be two years younger than their husbands.

### Percent Married for Occupational Death & Disability

85% of male members and 75% of female members are assumed to be married at termination from active service.

### Dependent Spouse Medical Coverage Election

Applies to members who do not have double medical coverage. 60% of male members and 50% of female members are assumed to be married and cover a dependent spouse.

### Part-Time Service

Part-time employees are assumed to earn 0.75 years of service per year.

### Imputed Data

Data changes from the prior year which are deemed to have an immaterial impact on liabilities and contribution rates are assumed to be correct in the current year's client data.

Active members with missing salary and service are assumed to be terminated with status based on their vesting percentage.

### Administrative Expenses

The Normal Cost as of June 30, 2025 was increased by \$10,000 for occupational death & disability and \$35,000 for retiree medical. These amounts are based on the average of actual administrative expenses during the last two fiscal years.

## 4 Basis of the Actuarial Valuation

### Healthcare Participation

| Death / Disability Decrement |               | Retirement Decrement |                         |
|------------------------------|---------------|----------------------|-------------------------|
| Age                          | Participation | Age                  | Participation*          |
| < 56                         | 75.0%         | 55                   | 50.0%                   |
| 56                           | 77.5%         | 56                   | 55.0%                   |
| 57                           | 80.0%         | 57                   | 60.0%                   |
| 58                           | 82.5%         | 58                   | 65.0%                   |
| 59                           | 85.0%         | 59                   | 70.0%                   |
| 60                           | 87.5%         | 60                   | 75.0%                   |
| 61                           | 90.0%         | 61                   | 80.0%                   |
| 62                           | 92.5%         | 62                   | 85.0%                   |
| 63                           | 95.0%         | 63                   | 90.0%                   |
| 64                           | 97.5%         | 64                   | 95.0%                   |
| 65+                          | 100.0%        | 65+                  | <b>Years of Service</b> |
|                              |               |                      | < 15      75.0%         |
|                              |               |                      | 15 - 19    80.0%        |
|                              |               |                      | 20 - 24    85.0%        |
|                              |               |                      | 25 - 29    90.0%        |
|                              |               |                      | 30+        95.0%        |

\* The participation assumption is a combination of (i) service-based rates for retirement from employment at age 65+ and (ii) age-based rates for retirement from employment before age 65. These rates reflect the expected plan election rate that varies by reason for decrement, duration that a member may pay full cost prior to Medicare eligibility, and availability of alternative and/or lower cost options, particularly in the Medicare market. This assumption is based on observed trends in participation from a range of other plans.

## 4 Basis of the Actuarial Valuation

### Healthcare Per Capita Claims Cost

Sample claims cost rates for FY26 are shown below. These costs are adjusted to age 65 and are before the base claims cost adjustments described below. Members are assumed to attain Medicare eligibility at age 65.

|                        | Medical   | Prescription Drugs |
|------------------------|-----------|--------------------|
| Pre-Medicare           | \$ 19,003 | \$ 5,158           |
| Medicare Parts A & B   | \$ 2,337  | \$ 5,381           |
| Medicare Part D – EGWP | N/A       | \$ 2,106           |

The smoothed FY26 EGWP subsidy assumption reflects a weighted blend of estimated reimbursements from FY22 through FY26. Since we received the estimated CY26 EGWP subsidy from Segal Consulting, the FY27 estimated subsidy is estimated as 6 months of the CY26 subsidy plus 6 months of this subsidy trended by the prescription drug trend table. This leads to a larger FY27 trend of 25.6%. Thereafter, the EGWP subsidy is assumed to increase in future years by the trend rates shown on the following pages. No future legislative changes or other events are expected to impact the EGWP subsidy. If any legislative or other changes occur in the future that impact the EGWP subsidy (which could either increase or decrease the plan's Actuarial Accrued Liability), those changes will be evaluated and quantified when they occur.

### Healthcare Base Claims Cost Adjustments

Due to higher initial copays, deductibles, out-of-pocket limits, and member cost sharing compared to the DB medical plan, the following cost adjustments are applied to the per capita claims cost rates above:

- 0.956 for the pre-Medicare plan.
- 0.674 for both the Medicare medical plan and Medicare coordination method (3.1% reduction for the medical plan and 29.5% reduction for the coordination method).
- 0.911 for the prescription drug plan.

### Healthcare Morbidity

Morbidity rates (also called aging factors) are used to estimate utilization of healthcare benefits at each age to reflect the fact that healthcare utilization typically increases with age. Separate morbidity rates are used for medical and prescription drug benefits. These rates are based on 2017-2021 actual experience.

| Age     | Medical | Prescription Drugs |
|---------|---------|--------------------|
| 0 - 44  | 2.0%    | 4.5%               |
| 45 - 54 | 2.5%    | 3.5%               |
| 55 - 64 | 2.5%    | 1.0%               |
| 65 - 74 | 2.0%    | 2.1%               |
| 75 - 84 | 2.2%    | (0.3%)             |
| 85 - 94 | 0.5%    | (2.5%)             |
| 95+     | 0.0%    | 0.0%               |

## 4 Basis of the Actuarial Valuation

### Healthcare Third Party Administrator Fees

\$353 per person per year; assumed to increase at 4.50% per year.

### Healthcare Cost Trend

The table below shows the rate used to project the cost from the shown fiscal year to the next fiscal year. For example, 6.20% is applied to the FY26 pre-Medicare medical claims costs to get the FY27 pre-Medicare medical claims costs.

| Fiscal Year | Medical Pre-65 | Medical Post-65 | Prescription Drugs / EGWP |
|-------------|----------------|-----------------|---------------------------|
| FY26        | 6.20%          | 5.40%           | 8.50% <sup>1</sup>        |
| FY27        | 6.05%          | 5.35%           | 8.20%                     |
| FY28        | 5.85%          | 5.35%           | 7.90%                     |
| FY29        | 5.65%          | 5.30%           | 7.45%                     |
| FY30        | 5.45%          | 5.30%           | 7.05%                     |
| FY31        | 5.30%          | 5.30%           | 6.60%                     |
| FY32        | 5.30%          | 5.30%           | 6.15%                     |
| FY33        | 5.30%          | 5.30%           | 5.70%                     |
| FY34-FY38   | 5.30%          | 5.30%           | 5.30%                     |
| FY39        | 5.25%          | 5.25%           | 5.30%                     |
| FY40        | 5.20%          | 5.20%           | 5.30%                     |
| FY41        | 5.10%          | 5.10%           | 5.20%                     |
| FY42        | 5.05%          | 5.05%           | 5.10%                     |
| FY43        | 4.95%          | 4.95%           | 5.00%                     |
| FY44        | 4.90%          | 4.90%           | 4.90%                     |
| FY45        | 4.80%          | 4.80%           | 4.85%                     |
| FY46        | 4.75%          | 4.75%           | 4.75%                     |
| FY47        | 4.70%          | 4.70%           | 4.70%                     |
| FY48        | 4.60%          | 4.60%           | 4.65%                     |
| FY49        | 4.55%          | 4.55%           | 4.55%                     |
| FY50+       | 4.50%          | 4.50%           | 4.50%                     |

For the June 30, 2014 valuation and later, the updated Society of Actuaries' Healthcare Cost Trend Model is used to project medical and prescription drug costs. This model estimates trend amounts that are projected out for 80 years. The model has been populated with assumptions that are specific to the State of Alaska.

---

<sup>1</sup> The FY26 trend rate applied to the EGWP subsidy is 25.60%.

## 4 Basis of the Actuarial Valuation

### Changes in Assumptions Since the Prior Valuation

The healthcare per capita claims cost assumption is updated annually as described in Section 4.2.

The amount included in the Normal Cost for administrative expenses was changed from \$36,000 to \$35,000 for retiree medical, but remained unchanged at \$10,000 for occupational death & disability. These amounts are based on the most recent two years of actual administrative expenses paid from plan assets.

In June 2025, the Board adopted a new payroll growth assumption of 1.00% effective beginning with the June 30, 2025 valuation. The prior payroll growth assumption was 2.75%. The Board adopted the new assumption to better match recent payroll growth experience.

There were no other changes in actuarial assumptions since the prior valuation.

## 4 Basis of the Actuarial Valuation

**Table 1: Salary Scale**

| Years of Service | Percent Increase |
|------------------|------------------|
| < 1              | 7.25%            |
| 1                | 6.75%            |
| 2                | 6.25%            |
| 3                | 5.75%            |
| 4                | 5.25%            |

Average annual earnings ("valuation pay") are the annualized earnings for the fiscal year ending on the valuation date.

# Glossary of Terms

## **Actuarial Accrued Liability**

Total accumulated cost to fund pension or postemployment benefits arising from service in all prior years.

## **Actuarial Cost Method**

Technique used to assign or allocate, in a systematic and consistent manner, the expected cost of a pension or postemployment plan for a group of plan members to the years of service that give rise to that cost.

## **Actuarial Present Value of Projected Benefits**

Amount which, together with future interest, is expected to be sufficient to pay all future benefits.

## **Actuarial Valuation**

Study of probable amounts of future pension or postemployment benefits and the necessary amount of contributions to fund those benefits.

## **Actuary**

Person who performs mathematical calculations pertaining to pension and insurance benefits based on specific procedures and assumptions.

## **GASB 74 and 75**

Governmental Accounting Standards Board Statement Number 74 amends Number 43 effective for the fiscal year beginning after June 15, 2016 and defines new financial reporting requirements for public postemployment benefit plans. Governmental Accounting Standards Board Statement Number 75 amends Number 45 effective for fiscal years beginning after June 15, 2017 and defines new accounting and financial reporting requirements for employers sponsoring public postemployment benefit plans.

## **Normal Cost**

That portion of the actuarial present value of benefits assigned to a particular year in respect to an individual participant or the plan as a whole.

## **Rate Payroll**

Members' earnings used to determine contribution rates.

## **Unfunded Actuarial Accrued Liability (UAAL)**

The portion of the actuarial accrued liability not offset by plan assets.

## **Valuation Payroll**

Members' earnings used to determine Normal Cost and Actuarial Accrued Liability.

## **Vested Benefits**

Benefits which are unconditionally guaranteed regardless of employment.
